Technical Data Sheet

Cleanspek 700

High Performance EVA Hotmelt Adhesive

Product Description

"Ultimelt COOL 7000 is a premium high-performance cool melt packaging adhesive formulated using premium metallocene polymer blend for world leading performance. This product is engineered to run at cool application temperatures to deliver reductions in both power consumption and reduced applicator burn risk. Designed as a versatile adhesive for case and carton sealing at a wide range of line speeds and substrate varieties.

Product Advantages

- Cleanspek 700 works instantly upon application with no cure or open time requirements.
- Cleanspek 700 increases load stability, decreasing movement and damage in transport.
- Cleanspek 700 works on all substrate and board types.
- Cleanspek 700 is a high yielding product with minimal cost per production unit.

Application

Cleanspek 700 should be applied between 135°c and 175°c through a nozzle system.

Bond for Life.®

Technical Data Sheet

Cleanspek 700

Technical Information

Adhesive type	Synthetic rubbers
Viscosity	175°C - 1450cps
Ring and ball softening point	82°C
Adhesive open time	Long
Adhesive set time	Medium
Adhesive molten tack	Medium
Colour	Clear
Shape	Pillow

Health & Safety

All the constituent parts of this adhesive comply with American FDA under CFR 21.175.105.

Health and Safety: Users must first read the Safety Data Sheet. Users should familiarize themselves with all the safety aspects of the product prior to usage.

Product Disclaimer

"Since the use and application of this product is beyond our control we cannot be held responsible for product field performance. The information presented above is the result of our considerable experience with this product but is not to be construed as a performance warranty. In every case we recommend that the customer conducts their own testing and accordingly determines, to their satisfaction, its suitability for their purpose under the operating conditions in which they will use the product/s.
