

Medium Residual Tack Palletising Adhesive

Product Description

Cleanspek 770 is a permanent palletising hot melt adhesive with medium residual tack for a broad range of substrates including sensitive graphics. Formulated on a unique blend of APAO polymers for consistent dosage and optimal pot life. Cleanspek 770 provide improved lateral resistance on all substrate types with minimal staining, tearing or pack damage.

Product Advantages

- Cleanspek 770 works instantly upon application with no cure or open time requirements.
- Cleanspek 770 increases load stability, decreasing movement and damage in transport.
- Cleanspek 770 will cause minimal damage, staining or tearing when depalletised.
- Cleanspek 770 is a high yielding product with minimal cost per production unit.

Application

Cleanspek 770 should be applied between 130°C and 150°C through a nozzle system.

Technical Information

Adhesive type

Amorphous Polyolefin

Viscosity

150°C - 350cps

Ring and ball softening point

82°C

Adhesive open time

Long

Adhesive set time

Medium

Adhesive molten tack

Medium

Colour

Light amber

Shape

Pillow

Health & Safety

All the constituent parts of this adhesive comply with American FDA under CFR 21.175.105.

Health and Safety: Users must first read the Safety Data Sheet. Users should familiarize themselves with all the safety aspects of the product prior to usage.
